
ACKNOWLEDGEMENTS

The Goleta Slough Management Committee (GSMC) would like to express appreciation to the many individuals, agencies and organizations that contributed to the *Goleta Slough Area Sea Level Rise and Management Plan*. First, our appreciation goes to the following agencies and groups that so generously donated funds to the preparation of this Plan:

- US Fish and Wildlife Service, Coastal Program
- California Coastal Conservancy
- County of Santa Barbara, Coastal Resource Enhancement Fund¹
- City of Santa Barbara, Airport Department
- Goleta West Sanitary District
- Goleta Valley Land Trust
- Associated Students UC Santa Barbara, Coastal Fund

In addition, innumerable hours were contributed by representatives of many agencies and non-profit and interest groups in the area. These people tirelessly offered input to make the plan better and collaborated on many aspects, particularly the possible adaptations to sea level rise and the updated goals, policies and actions.

One key step in the development of this document was the input received at five “focus group” meetings on Goleta Slough habitat and infrastructure vulnerabilities held on February 11th and 12th, 2014. The five focus groups were:

- Environmental Community
- Local/Regional Agencies
- Regulatory Agencies
- Sanitary Districts/Utilities
- Santa Barbara Airport

Each of these focus group meetings included in-depth discussions of the current state of the science and issues associated with sea level rise, as well as detailed discussions regarding vulnerability and adaptation strategies in their particular area of expertise and interest. The participants in the focus groups and GSMC meetings where the Plan was discussed are:

Richard Abrams – Santa Barbara County Office of Emergency Services
Heather Allen – Santa Barbara County Planning & Development Dept., Long Range Planning
Jim Bailard – Beach Erosion Authority for Clean Oceans and Nourishment (BEACON)
Andrew Bermond – City of Santa Barbara, Airport Department
Rick Bush – National Marine Fisheries Service
Hillary Campbell – Santa Barbara County 2nd District Board of Supervisors representative
Trish Chapman – Coastal Conservancy
Gerald Comati - BEACON
Steve Conner – UCSB Campus Planning and Design
Pete Conception – City of Santa Barbara, Airport Department
Scott Cooper – Santa Barbara Audubon Society and UCSB Emeritus Professor
Jenna Driscoll – Santa Barbara Channelkeeper

¹ This plan was financed in part by Santa Barbara County’s Coastal Resource Enhancement Fund, a partial mitigation of impacts from the following offshore oil and gas projects: Point Arguello, Point Pedernales, and Santa Ynez Unit.

Rosie Dyste – City of Santa Barbara Planning Division
 Rick Frickman – Urban Creeks Council
 Amber Geraghty – California Coastal Commission
 Steve Greer – City of Santa Barbara, Community Development Department
 Katie Hentrich – Santa Barbara County Planning & Development Department
 Karin Hodin – Growing Solutions
 Mark Holmgren - Ornithologist
 Steve Hudson – California Coastal Commission
 Peter Imhof - Santa Barbara County Association of Governments
 Hazel Johns – City of Santa Barbara, Airport Department
 Johanna Kisner – Kisner Environmental
 Liz Limon – City of Santa Barbara, Community Development Department
 Dennis Lowrey – Southern California Gas Company/Sempra Energy
 Jeff Onsted – Florida International University
 Brian McCarthy – Goleta West Sanitary District
 Jeff McKee – City of Santa Barbara, Airport Department
 Mary Meyer – California Department of Fish and Wildlife
 Monique Myer – California Sea Grant, Marine Science Institute, UC Santa Barbara
 Mark Nation - Goleta West Sanitary District
 April Price – UC Santa Barbara, Coal Oil Point Reserve
 Karen Ramsdell – City of Santa Barbara, Airport Department
 Bruce Reitherman – Land Trust for Santa Barbara County
 Leif Reynolds – City of Santa Barbara, Public Works Department
 Mary Root – US Fish and Wildlife Service
 Chandra Slaven – City of Goleta, Planning and Environmental Review Department
 Maureen Spencer – Santa Barbara County Flood Control District
 Lisa Stratton – UC Santa Barbara, Cheadle Center for Biodiversity and Ecological Restoration
 Owen Thomas – City of Santa Barbara, Public Works Department
 Christine Thompson – California Department of Fish and Wildlife
 Molly Troup – California Coastal Commission
 Steve Wagner – Goleta Sanitary District
 Brooke Welch – Goleta Water District
 Anne Wells – City of Goleta, Planning and Environmental Review Department
 Ed Wiegman – Southern California Gas Company/Sempra Energy

The overall goal of the Goleta Slough Management Committee and the *Goleta Slough Area Sea Level Rise and Management Plan* is to provide coordinated management of the Goleta Slough Ecosystem and to provide for a healthy slough ecosystem by implementing the most beneficial plans, mitigation protection or restoration projects possible. The individuals, agencies and groups listed above contributed to that goal and we thank them.

Finally, several people on the consultant team and representatives of GSMC researched and wrote this Plan and deserve special mention, including:

Andrew Bermond, City of Santa Barbara
 Airport
 Bob Battalio, ESA
 Dane Behrens, ESA
 Rachel Couch, California Coastal
 Conservancy
 Eddie Divita, ESA

Dave Hubbard, Coastal Restoration
 Consultants
 Jeremy Lowe, SFEI (formerly ESA)
 Dave Revell, Revell Coastal (formerly
 ESA)
 Pat Saley, GSMC staff and facilitator
